FLAME ARRESTER EXPLOSION PROOF IN-LINE

INTRODUCTION

The model KSFH inline flame arrester is designed, manufactured, tested according to API 2000, British Standard Specification Code BS7244, and EN 12874 / ISO 16852. The units are passive devices with no moving parts. They prevent the propagation of flame from the exposed side of the unit to the protected side by the use of a 316L stainless steel crimped metal ribbon type flame cell element. This construction produces a matrix of uniform opening that are carefully constructed to quench the flame by absorbing the heat.

Operating Temperature @ Pressure

KSFH / DN 50 ~ DN 350

+ 60°C (=140°F) @ 1.1 bar abs

Body Materials Aluminium, Nodular Iron, Cast Steel, SS304, SS316, SS316L with various trims (Different materials available on request)

Sizes range DN 50 ~ DN 350 with ANSI 150lb flanges(Different connections available on request)

Rules & certifications API 2000, BS7244, and EN 12874 / ISO 16852
Flame cell : NEC group D or IEC IIA Gases(Other gas groups all available as extras)

Optimum / optional Design & Arrangements Stem Jacket type, Steam Tracing type

MAINTENANCE

- ⚠ Periodic inspection and maintenance is required. The cell assembly can be removed for cleaning purposes.
- ⚠ Cleaning can be accomplished by dipping the entire cell assembly into an appropriate solvent.
- ⚠ Care should be taken not to damage the cell openings as such deformations hamper the flow through the cell.
- ⚠ The gaskets should be inspected and replaced if necessary.
